COMPANY

Feel@NET

Feelanet is an IT company provides Consulting,
Solution/Hardware Supply, System Building, and Technical
Support Service to Maximize the Value of Customers' IT Assets

Company Feelanet Co., Ltd.

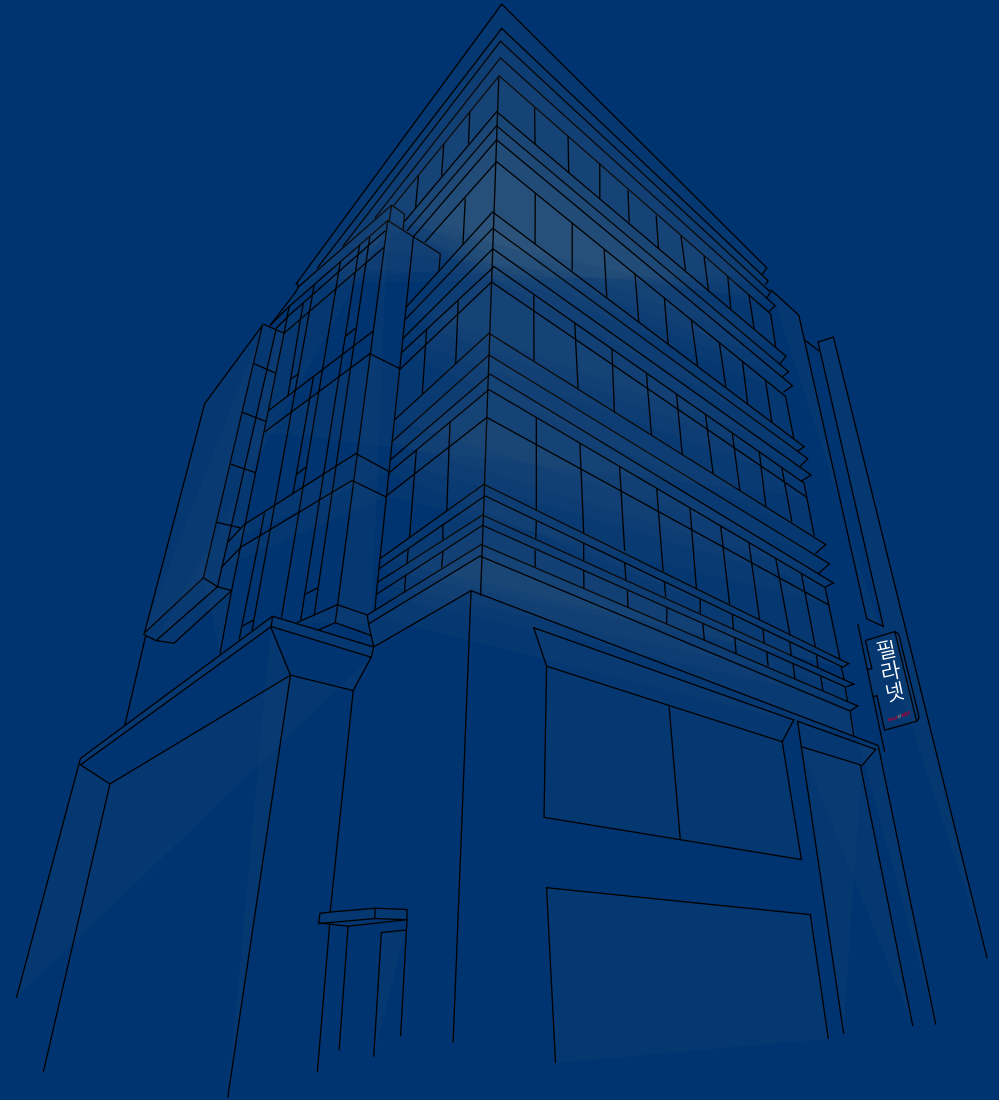

CEO Junghyeok Kim, Yangkyu Kim

Founded May 9, 2002

Headquarters 164 Dosan-daero, Gangnam-gu, Seoul, Republic of Korea

Web www.feelanet.com

Field of Business IT Consulting / IT Solution providing and building / Network service / COUNTER-UAS system / EO-IR Camera manufacturing

VISION

Maximizing IT asset value of our customers
is the value of Feelanet

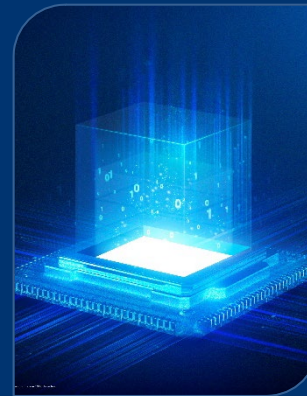

Professional

A specialized company offering
comprehensive solutions

Leading

Driving customer success
with cutting-edge innovation

Enhancing

Providing advanced technology
for optimal IT performance

Unifying

A company offering an
integrated management platform
from solution deployment to
cloud and on-premise services

We will continue to strive for greater heights

**2002 ~
2017**

- Established Feelanet Co., Ltd.
- Active Directory infrastructure consulting
- Awarded Excellent Partner at Microsoft Korea Partner Conference
- Awarded Best Partner at Microsoft Worldwide Partner Conference
- Achieved the Microsoft Gold Certified Partner Level

**2018 ~
2021**

- Awarded Microsoft Korea Best BPIO Partner
- Selected as SME for Management Innovation Business (Main-Biz)
- M&A WebPlus Groupware Business
- Acquired HPE Aruba ACMX & ACSP Qualification
- Launched FIDO-based Authentication Solution (art.StrongID)
- M&A UbiBase' Unified Communication Business
- **Launched IoT-based Integrated Control Platform Solution (fx.EagleEye)**
- **C-UAS(Anti-Drone System) at Incheon Int'l Airport**
- Awarded "Excellence" for Excellent Job-Creation Company
- ISO 9001:2015 Quality Management System Certification
- Selected as a SME of good-workplace in Seoul
- Incorporation of Hanil Holdings (Seoulland) as a Subsidiary

**2022 ~
2024**

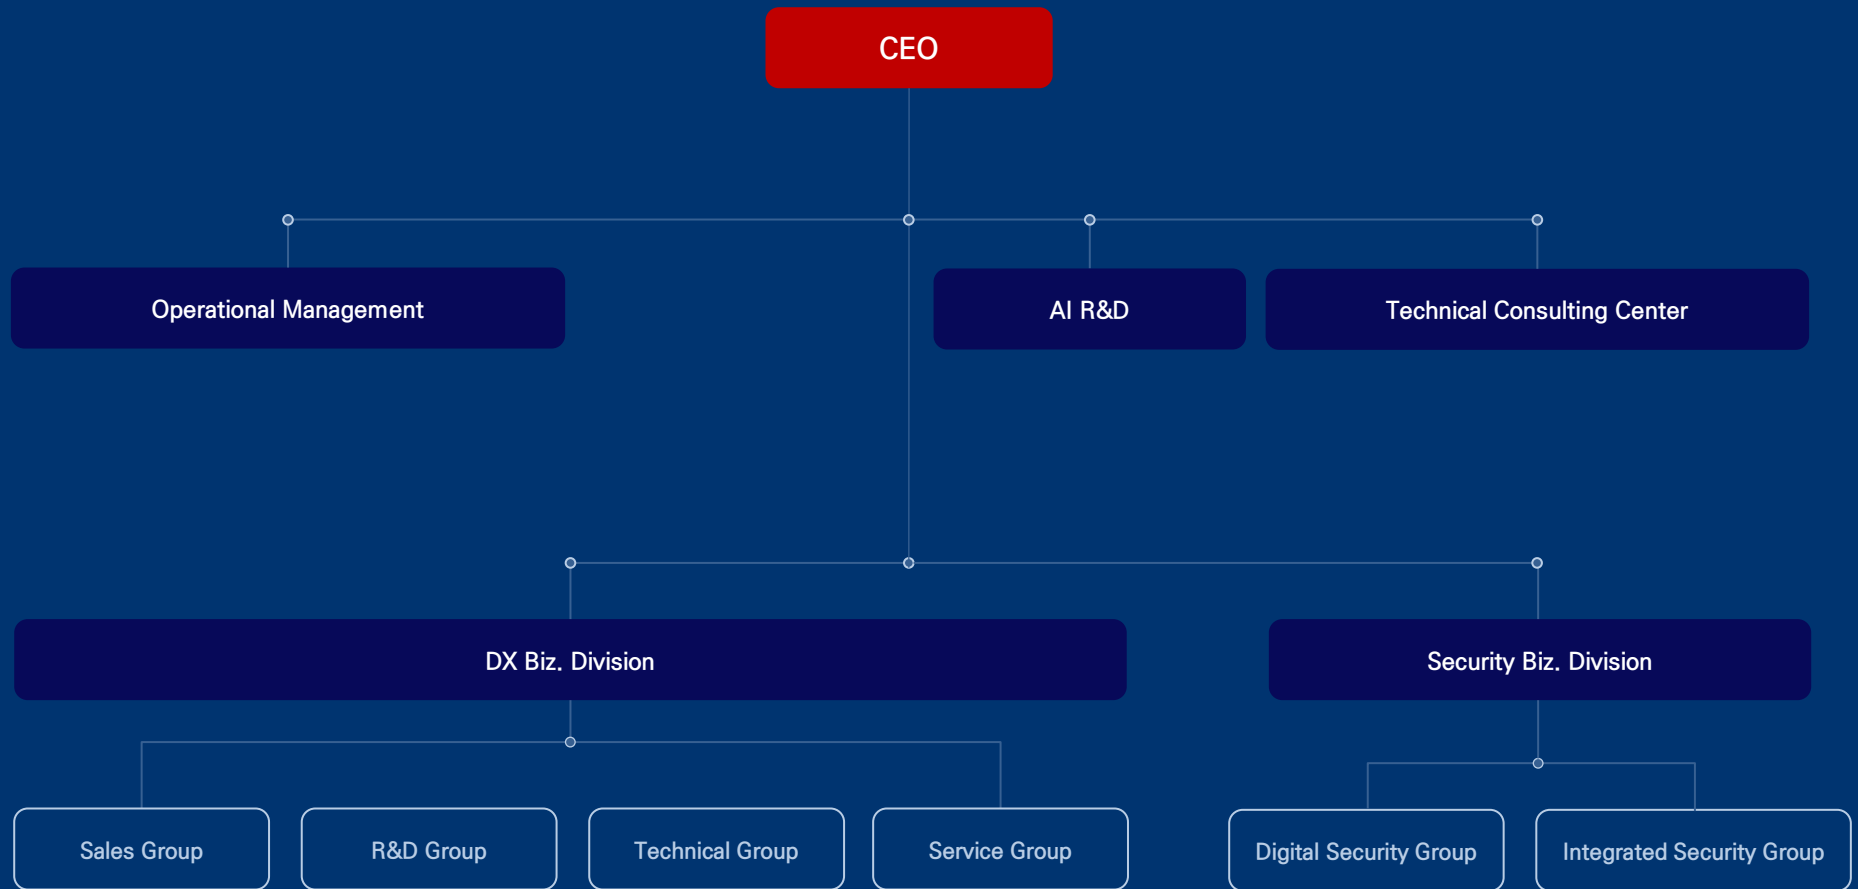

- Wireless Network Service Provider selected by Samsung Electronics
- Presidential Awarded for Best Jobs in 2020 (Korean Government)
- **High Performance EO/IR Camera for National Police**
- **AI Voucher Support Project Implementation Agency**
- **Patented Drone Control and Detection System with Identification**
- **Drone Flight Test Airport System for KIAST**
- Opening of M365 Support Center
- **IoT-Based Integrated Command & Control System for Korean Navy & Coast Guard Shipyard**

2025 ~

- **C-UAS(Drone Detection EOIR Camera) at Gimpo Int'l Airport and Jeju Int'l Airport**
- **High Performance EO/IR system for Wind Farm (West Sea)**
- Signed MOU for Joint Commercialization of OpsNow
- **C-UAS(Drone Detection EOIR Camera) at Korea Western Power(KEPCO)**
- **Anti-Drone and Integrated Monitoring Systems at Busan Port and Ulsan Port(MOF)**

Improved User
Convenience and
Provided a Smart
Environment

Based on Microsoft technology and Active Directory (AD), it maintains security policy consistency, centralized account management, and strengthens authentication. Through a comprehensive approach to account, authentication, and data protection, companies can increase operational efficiency and minimize security risks.

By establishing the Microsoft 365 environment, we improve user convenience and provide a smart work environment that can be accessed anytime, anywhere

Infra Security

Infrastructure Security

We provide Active Directory and Microsoft 365 deployment and related professional consulting services

art.LiveID

Lifecycle management of AD accounts integrated with HR systems

art.Deploy

Self-enroll to the AD domain

art.FederationID

SSO management portal powered by AD FS

art.StrongID

Multi-factor authentication for AD based on ownership base (SMS, email, biometrics, OTP)

art.PSS

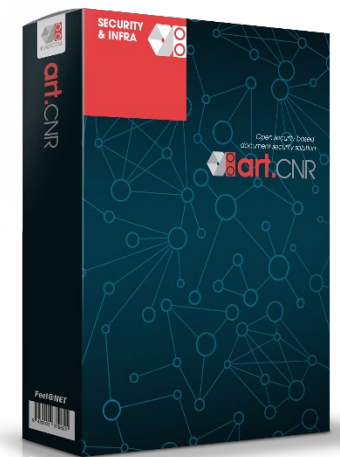

Self-service password reset and account unlock

art.365

Automated license provisioning and integration of core M365 admin center functions

art.CNR for Gateway

AIP-based document encryption/decryption integrated with business systems

Smart Workplace

Smart Work Business

Teams-based Groupware
and Provide Collaborative
Solutions.

Building a Collaboration Platform Based on Microsoft Teams

Integration

Smart
Business
Process

User Friendly
Interface

It provides various functions to optimize the business environment,
We provide collaboration and work efficiency solutions tailored to your organization's needs.

By further expanding and optimizing existing MS Teams features,
It supports various tasks such as organizational communication, document management, and electronic approval.

Smart Workplace

Smart Work Solution

TeamsPlus Portal

Multi-corporation and various management functions

TeamsPlus Org Chart

Personnel-linked hierarchical organization chart

TeamsPlus e-Approval

Integrated approval aligned with Korean-style business systems

TeamsPlus Notification Bot

Azure Bot delivers real-time task notifications

eum.DAMS

Supports large attachments, org charts, and automated signatures management

eum.CubeLook

Security document export application/approval, collection/view history inquiry

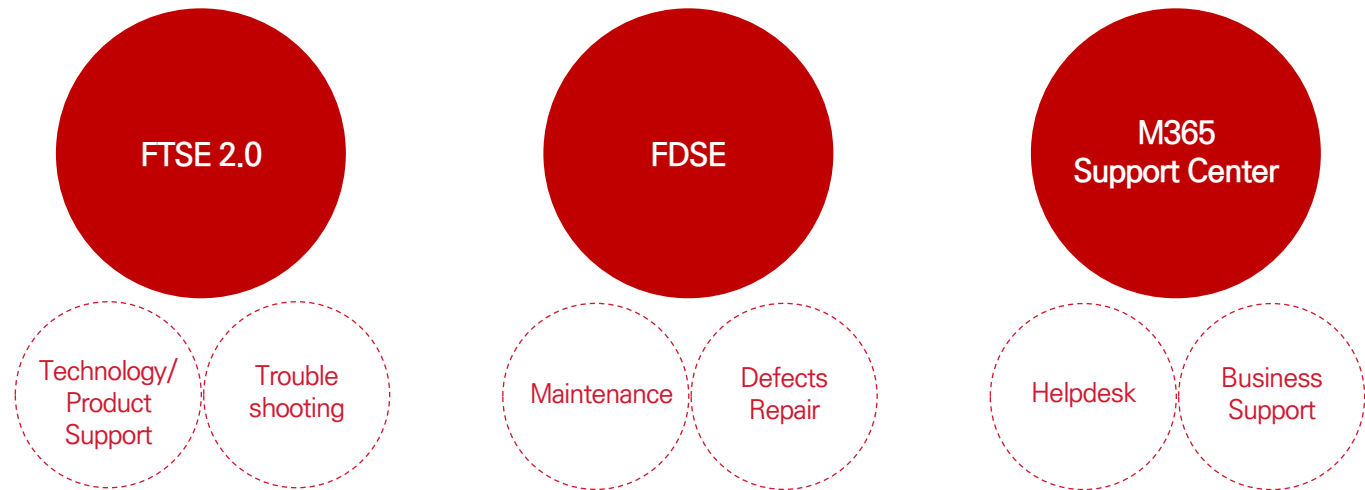

Technical Support

Technical Support

We provide the experience and skills of technical experts targeting Microsoft technologies and products.

Professional Technical Support for Corporate Customers Introduced by Microsoft

- **FTSE** : Feelanet Technical Support for Enterprise
- **FDSE** : Feelanet Development Support for Enterprise

For corporate IT managers through systematic processes of FTSE2.0 and FDSE
We support a variety of specialized technologies.

Utilizing cloud and business support services and professional management systems through the M365 Support Center
We establish a technical support response system suited to various work environments.

Technical Support

Technical Support

FTSE 2.0

- Rapid problem handling by professional personnel
- Issue and problem resolution
- Technical training and consulting
- Supports all MS products
- 365x24 support

MS Technology and Products Target

FDSE

- Assignment of Technical Manager
- User-specific guide provided
- Report provided after troubleshooting
- Various channel response management
- Professional manpower support

FEELANET Supply Solutions

M365 Support Center

- M365 expert engineer support
- HelpDesk operation
- Check and apply security policy
- Initial status and change history management
- Report important service issues

Microsoft365 Target

Network Infrastructure

Network Business

Provides wireless network operation, design, and deployment solutions based on HPE Aruba

HPE Gold Solution Provider
– Networking

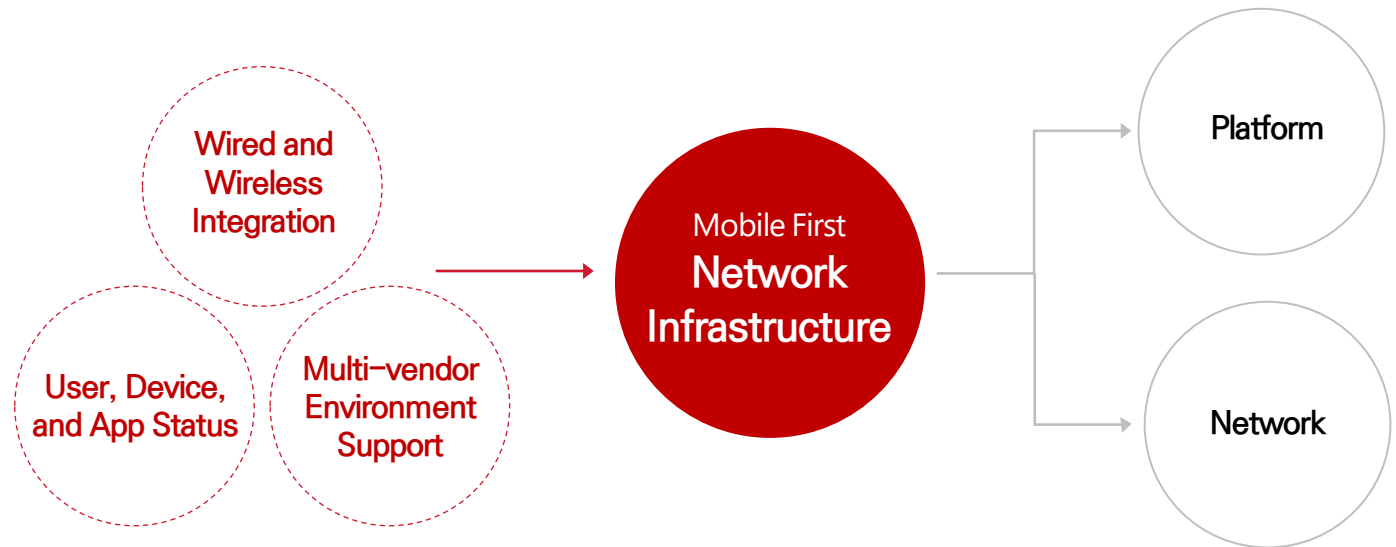

**Hewlett Packard
Enterprise**

Partner Expertise

Gold Solution Provider - Networking
Business Solution Provider
Partner Branded Support - Networking
As-a-Service - Networking

All-in-one from Network Construction to Integrated Operation Management

Supports highly scalable wired networks (switches, routers) and high-speed connections. Wireless access points (APs) provide superior Wi-Fi performance and location services.

We provide integrated solutions for efficient operation of wired and wireless networks through network design optimized for various work environments, including campuses, branch offices, data centers, and remote work environments.

Network Solution

art.WIPS

Enhance wireless security and operational efficiency with HPE Aruba WIPS

art.IPMS

Ensures secure, reliable connection anytime, anywhere with DHCP-based fixed IP

art.GreenAP

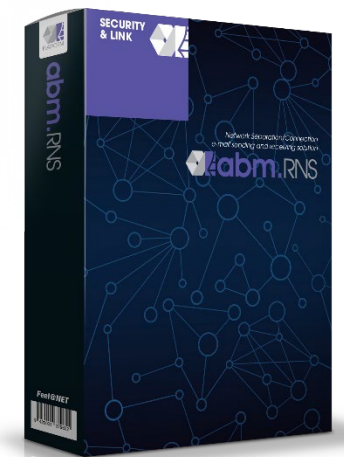

Korea's first energy saving solution based on AI

abm.RNS

Safety without dependence on network connection system for sending and receiving external mail in business network

HPE aruba Networking

Aruba-Juniper one-stop integrated service provided

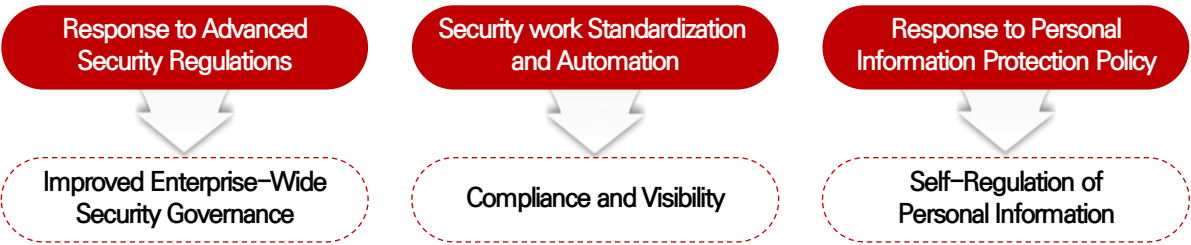

Security Risk Management Platform

We provide a security risk management platform that is sufficient for various security regulations and management

Necessity

Integrated Security Risk Management	Unified security operation and response by establishing a company-wide integrated security management system
Strengthening Autonomous Security System	Establishment of an autonomous security system that reflects the latest regulatory information and automation of work
Security Training and Awareness Raising	Understand the importance of security risk management and comply with security-related laws/regulations

Effects

- Compliance
ISMS-P, ISO27001, Information security continuous evaluation and response inspection standards by control item/trace management
- Vulnerability and Security Deliberation, Security Policy Application/Approval
Infrastructure vulnerability and penetration testing management, structured security review, and security policy approval
- Life Cycle Protect
Personal information processing system/file management, entrusted personal information management supervision, personal information lifecycle management
- Global Information Protection Law/Regulation Management (RegTech)
Global information protection and personal information protection law/regulation management

Security Risk Management Platform

fx.Sentinel

Integrated information
security work management

fx.PBridge

Integrated personal information
protection management

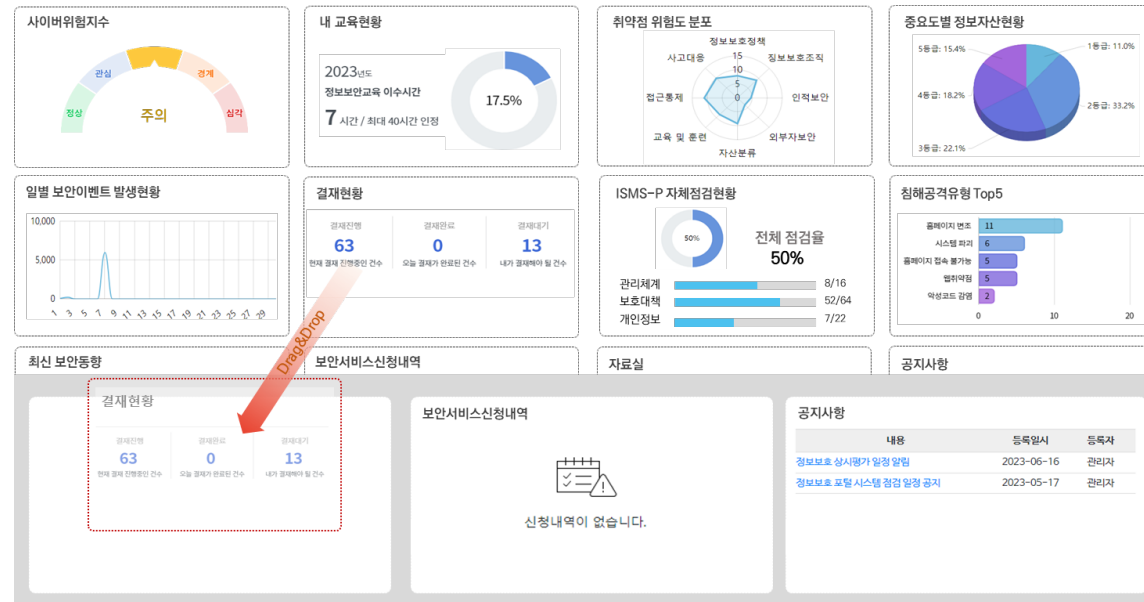

fx.Regtech

Global information protection
law/regulation management

Workflow & Dashboard

Task-Specific Dashboards

A highly useful dashboard for each task is provided in the form of a basic widget, and the dashboard is configured on the settings screen according to the user role.

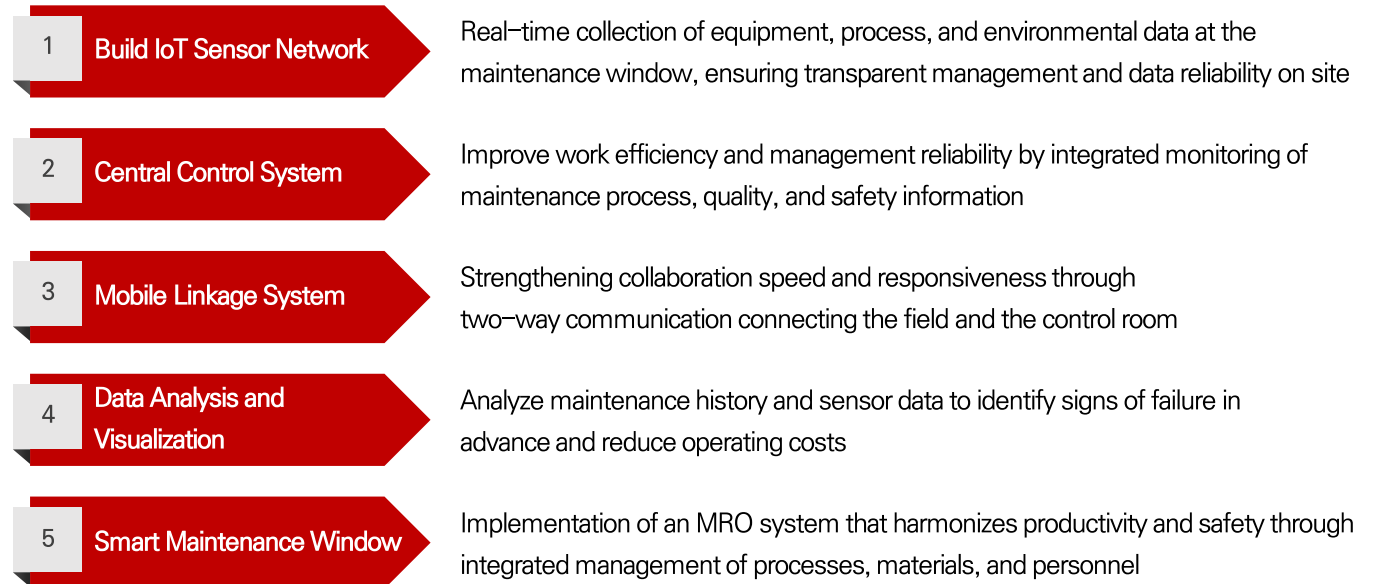

All in one Total System

IoT Platform

We realize a
'smart maintenance
window' with real-time
data and IoT technology.

Promotion Strategy and Performance

Real-Time Monitoring

- Real-time collection and analysis of maintenance process, environment, and safety status

Integrated Management

- Manage equipment, personnel, and parts information on a single platform

Predictive Maintenance

- Predicting breakdown and repair times using IoT sensor data

Improve Quality

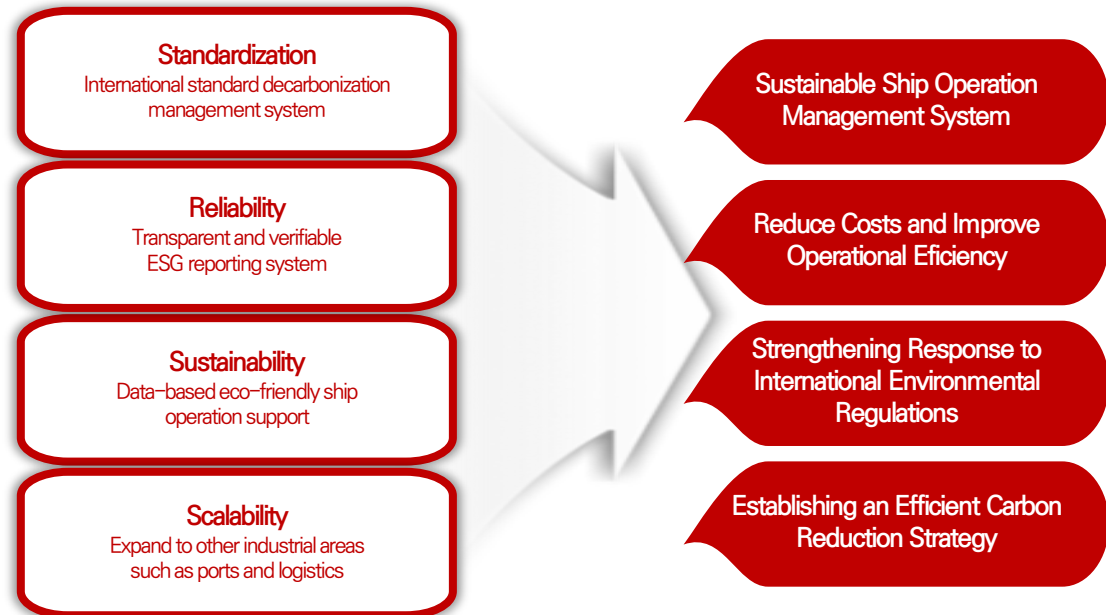

- Enhancing process quality and safety through big data analysis

All in one Total System

Decarbonization Strategy Platform

Customized ship
management strategy
platform based on the
#NET Platform that
supports the eco-friendly
conversion of ships

Digital Solutions for Carbon Reduction Strategy Establishment, Simulation, and ESG Management

Digitalization & Traceability

- Carbon emission-related indicators and simulation results can be systematically managed by digitizing and converting them into data

Customization

- Provide customized strategic scenarios according to vessel operation patterns and customer needs

Standardization

- Secure objective and consistent analysis results by standardizing standard information and strategic indicators

Systematization

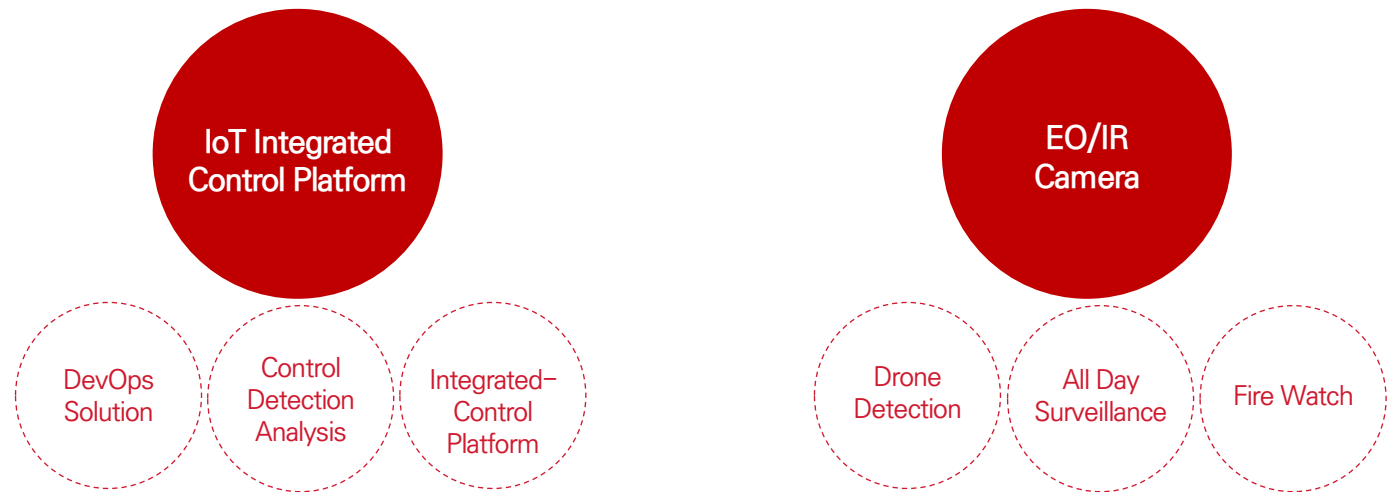

- User-friendly UI/UX-based integrated management system allows for result monitoring and feedback

Security Control

Integrated- Control Platform

Software development and operation,
The entire process from control to response
This is a supported platform

From Software Development to IoT-based Integrated Control Platform

Based on standard architecture and interface,

We provide a comprehensive solution that combines an IoT integrated control platform and EO/IR cameras

An IoT integrated control platform that collects data throughout the entire process from detection to response and can be applied to various industrial fields. We provide high-performance EO/IR cameras optimized for land, coastal, and riverine surveillance as well as drone detection.

Security Control

Integrated- Control Platform

KDDS Korea Drone Dome System

Supports the entire process from detection to response and real-time data collection

Lynceus-D,B EO/IR Camera

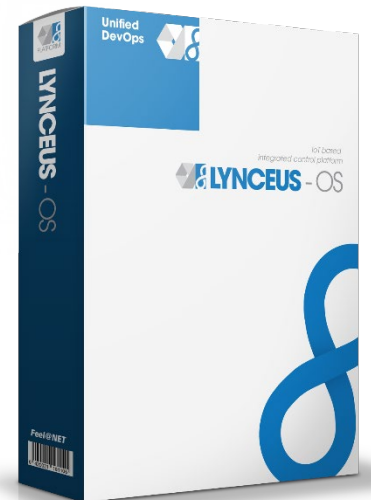

High-performance camera for drone detection and bird identification

fx.EagleEye IoT Integrated-Control Platform

Applies to all industries including transportation, aviation, drones, electric/hydrogen batteries, production, logistics, sales, performance, certification, and access.

Lynceus-S EO/IR Camera

Coastal and border area surveillance day and night camera

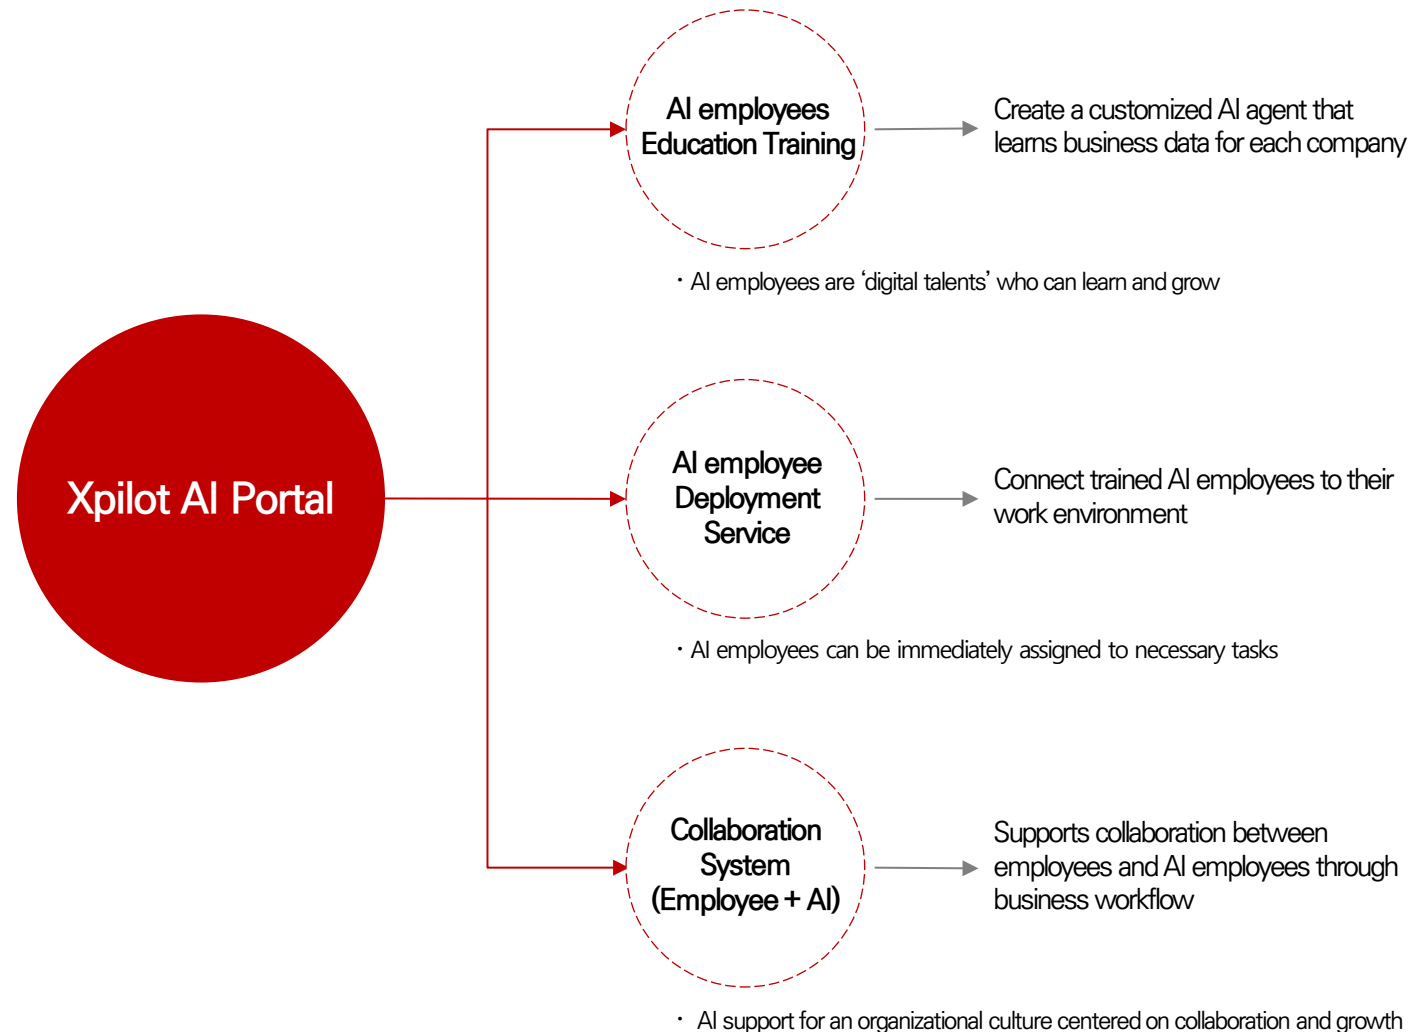

Agentic AI Business

Agentic AI 'Xpilot'
This is a service that trains AI employees who perform necessary tasks and deploys them to work

Train AI Employees and Deploy AI Employees to Necessary Tasks

Client

Overview

We maximize the value of IT assets for major customers

Such as manufacturing, service, logistics distribution, finance, and public sector
